FinOps 360 | Executive Insights & Recommendations
NexaCloud Solutions | FY2022–FY2024

📈 REVENUE PERFORMANCE

• Total revenue of ₹41.63M generated across FY2022–FY2024
• Average monthly revenue of ₹1.16M with consistent upward trend
• Subscription revenue is the dominant category driving 60%+ of total revenue
• Analytics Add-on leads gross margin at 68.47% — highest among all product lines
• North and West regions are the top revenue contributors

⚠ CHURN & RETENTION RISK

• Overall churn rate of 17.5% is above industry benchmark of 5–7%
• 210 customers churned — resulting in significant MRR loss
• Price Too High and Competitor are the top 2 churn reasons
• Enterprise segment shows lowest churn — highest stickiness
• Voluntary churn dominates at 75% — indicating product/price fit issues
• Win-back opportunity exists for eligible churned accounts

💰 PROFITABILITY HIGHLIGHTS

• Gross margin of 67.96% is strong and above SaaS industry average of 60–65%
• Professional Services carries highest COGS at 55% — margin pressure risk
• EBITDA trend shows steady growth across the 3-year period
• G&A and R&D departments consistently exceed budget — cost control needed
• Subscription-based recurring revenue provides stable and predictable cash flow

✅ STRATEGIC RECOMMENDATIONS

1. **REDUCE CHURN** — Launch proactive CSM outreach for all Critical and At Risk health score customers immediately. Target: reduce churn rate to below 10%

2. **PRICING STRATEGY** — Review Starter plan pricing. Price Too High is the #1 churn reason — consider introducing a lower entry-tier or flexible billing

3. **EXPAND HIGH-MARGIN PRODUCTS** — Analytics Add-on and API Suite show highest margins. Prioritize upsell campaigns targeting SMB and Mid-Market segments

4. **COST CONTROL** — G&A and R&D departments regularly exceed budget. Implement quarterly budget review checkpoints

5. **WIN-BACK CAMPAIGN** — Engage win-back eligible churned customers with targeted offers. Recovery of even 20% could add significant MRR
